## M.D. BATTLE RIVER COUNCIL MINUTES

The Council of the Municipal District of Battle River No. 423 met in the Municipal Office at Irma, with Messrs. Smallwood, Burton, Santee, and Burrell present.

Minutes of August 13th were read and on motion, C. D.

Moved by Mr. Burton that the Secretary write the proper authorities for a copy of blue print regarding the S. W. 18-48-8 With. C. D.

Correspondence read from the Women's Institute, Irma regarding the Irma Cemetery.

Moved by Mr. Smallwood that this Council consider the contents of the letter from the Women's Institute at the present time. C. D.

Moved by Mr. Santee that the Secretary hand over the lease papers to Mr. G. W. Mitchell for the leasing of Road Allowance between Sections 11 and 12-45-9 With with the necessary instructions. C. D.

Moved by Mr. Burton that the Secretary write the Minister of Municipal Affairs regarding the placing of Rural Mail Boxes in obstructing places on the Road allowances. C. D.

Moved by Mr. Burton that the Secretary notify all parties concerned by registered mail regarding the fencing of Road allowances, same to be removed at once by order of the Council. C. D.

Public auction sale of the S. W. N. E. and N. W. of 20-44-9 With opened at 2 P. M. No bids received. Sale was declared closed.

Moved by Mr. Santee that this Council accept a private bid given by J. Bell for the amount of \$1200 for the S. W. N. E. and N. W. of 20-44-9 With with 20 per cent. cash and the balance in three equal annual instalments at 8 per cent. per annum, with the option of paying all of the amount at any time be accepted, subjected to the approval of the minister. C. D.

Moved by Mr. Santee that Mr. Burton be appointed Deputy Reeve for the next six months and make the sale and sale of home-cooking a success on Saturday last.

The W. A. are putting on a Whist Drive in the Masonic Hall, Friday, October 4th. Everybody come and have a good time.

Next meeting of the W. A. will be at the home of Mrs. F. Thurston, September 24th.

APPLICATION FOR LEASE OF ROAD ALLOWANCE OR SURVEYED HIGHWAY

Notice is hereby given that G. W. Mitchell of Irma has made application to the Minister of Public Works, Edmonton, for a lease of the following road allowance or surveyed highway:

viz: Between Sections 11 and 12-45-9 With at point of division. Any protest against the granting of the above mentioned lease must be forwarded to the Minister of Public Works, Edmonton, within thirty days from the date of this notice.

Dated at Irma, Sept. 10th, 1929.

G. W. Mitchell, Applicant.

KINSELLA

Mrs. E. C. Williams received the sad news on Friday of the death of her niece at Ponoka. She left on the evening train to attend the funeral which was on Saturday.

Mrs. Williams returned home on Monday.

Mr. and Mrs. Percy Jones of Irma spent Friday evening with Mr. and Mrs. R. Eaton.

Mrs. Lund of Viking has been spending the past week with her daughter Mrs. P. J. Wangness and Mrs. Carl Smogard.

Mr. Raymond Miller who has been working in the oil fields near Calgary spent a few days at his home here.

Mr. Gordon Grabb who has been working for the Jamieson Construction Co., left for his home in Manitoba on Tuesday.

Threshing is the order of the day around here now, it will not be a very long time this Fall as the crops are very light.

Mr. Joe Justik left last week for Camrose where he is attending Normal.

Mrs. Figgie opened her restaurant last week.

Mr. and Mrs. W. Anderson spent Sunday at Pabayan with Mr. and Mrs. Batchelor. Little Betty Batchelor returned home with them to spend a few days.

R. Headon, Poundkeeper, Pabayan P. O.

NOTICE OF SALE OF IMPOUNDED ANIMALS

To Whom It May Concern:

NOTICE is hereby given that by virtue of power granted under Section 44 of The Domestic Animals Act (Municipalities) and of By-Law No. 423 of the Municipality of Battle River, dated September 9th, 1929, One Bay Mare about 1000 lbs. age about 8 or 9 years, white star in forehead, hind legs white just above fetlocks. Wires cut on left foreleg, also cut on right shoulder, both old scars. Branded A on left hip. Impounded September 8th, 1929; will be sold at the pound kept by the undersigned, on the S. E. 1-4 Section 32-45-7 with at 1 o'clock on Saturday the 21st day of September, 1929.

R. Headon, Poundkeeper, Pabayan P. O.

## CHURCH NOTICES AND ACTIVITIES

UNITED CHURCH NOTICES

The United Church services for next Sunday will be held at Strawberry Plains, Alma Mater and Irma at the usual hours. The topic for next Sunday is "The First Commandment"—The Fundamental basis of Human Life.

The Rev. J. R. Geeson is commencing with next Sunday a series of sermons on the Ten Commandments. This promises to be an instructive and interesting series. It is to be hoped that all who can will make a special effort to attend.

On Friday last, the executive of the Sunday School met at the home of Mrs. Schon. Mr. Reed was unanimously elected Assistant-Superintendent. Mrs. Locke was also unanimously elected Assistant-Superintendent, while the other officers remain as decided last May.

Plans were made to hold Rally Day on the last Sunday in September. It is hoped that a great interest will be shown in this important annual Sunday School event. At the conclusion of the meeting Mrs. Schon served a delightful lunch.

ANGELICAN CHURCH

There will be a service in the Masonic Hall on Sunday next, September 15th, at 11 A. M. The Holy Communion will be celebrated at this service.

Subject: "The Communion of Saints" A. M. Trendell, Vicar of Wainwright

NOTICE

Please note all members of Irma Lodge No. 56 I. O. O. F. that Mr. Robert A. Parker, Asst. to the Grand Secretary will make an official visit to this Lodge on September 17th. Will members make a special effort to attend this meeting.

Chas. Wilbraham, Sec.

NOTICE

The members of the W. A. wish to thank all those who came and made the sale and sale of home-cooking a success on Saturday last.

The W. A. are putting on a Whist Drive in the Masonic Hall, Friday, October 4th. Everybody come and have a good time.

Next meeting of the W. A. will be at the home of Mrs. F. Thurston, September 24th.

## DRILLING FOR OIL EAST OF VIKING

(From the Viking News)

The Duluth Syndicate has started drilling for oil on a location on Sec. 29-48-10, with M. which is six miles north and 14 miles east of Viking. The first well will be known as the MacDonald No. 1. They are using a string and cable outfit and will go down at least 4,000 feet in search of oil.

J. A. Manning, of Calgary, is the manager, and Chas. Miller, head driller. There are two crews and work will go on night and day.

The syndicate has a contract to drill two wells, and as geologists have given this location a very good report, the chances of striking a flow of oil in this structure are very promising.

The manager said that they are going to make a real test of the field, and the results of the drilling will be watched with keen interest, as it is believed in spite of other half hearted efforts to get oil in this district, that here is sure to be pool of the golden fluid somewhere in this field which abounds with natural gas.

RAILWAY AGENT TO KEEP CAR ORDER BOOK OPEN

The Alberta Wheat Pool has been calling the attention of its members to important changes in the Canada Grain Act which were made at the last session of parliament.

It is mentioned that a new feature in marketing wheat this year is contained in the requirements of the regulations governing Car Order Book. The only method of obtaining a car is for the grain producer to have his name placed in this book, either by himself or by his agent appointed in writing.

Under the old system it was not compulsory for an agent to open a Car Order Book unless requested to do so. Furthermore, it was a common practice for one individual to act as agent for more than one person at a time. It is hoped by this method to overcome the weakness of the old proxy system.

Each signer is given a car in turn, and the Railway Agent must notify the applicant when a car is available for him. The applicant is then given three hours within which to declare his intention and ability to load the car and a further time allowance of 24 hours is given within which to load. If the applicant cannot load the car it goes to the next name on the list who ordered a car of that capacity.

Agents of elevator companies must sign for cars in the same manner as the grain producers, and are treated the same, except that they are allowed two cars as compared with one for the farmer. This is to allow elevator companies to ship their accumulations of street wheat.

It is not necessary for a grain producer to have his grain in the elevator when he signs the Car Order Book, but it is wise for him to have all plans made in order to anticipate his turn, so that he can load his car within the required time.

The World Famous Winnipeg Kiddies will pay a visit to Irma, and will present a program unequalled at Keifer's Theatre, Irma, on Monday, September 16th. The Kiddies are on their Twelfth Annual Tour, and are now on their way home after a very successful tour of the Capital Circuit, and Alaska. They appear at Irma, with the permission of the Dept. of Education and Child Welfare Association. They carry their own school teacher, Wardrobe Mistress and Musical Director. A wonderful program of Songs, Dances, Musical Novelties, Acrobatics. Comedy and Harmony Singing. A Guaranteed attraction. The finest aggregation ever to appear in Irma. It's a real treat. Don't miss it.

Don't do business on the other fellow's batteries.

There were 11 children examined at the Baby Clinic, which was held at Irma August 22nd under the auspices of the W. L. The Women's Institute will hold their Bazaar on November 30th in Keifer's hall. Anyone having any sewing, for the bazaar please leave it at the home of the Secretary before that date.

## NEWS ITEMS FROM KINSELLA

Threshing is in full swing in all parts of the district and with favorable weather the present week will see nearly all threshing completed.

The yield is running anywhere from 3 to 15 bushels to the acre. Grain already delivered to the elevators is reported to be grading tough in about 70 per cent. of the cases. There has been practically no rain so this condition must be caused by threshing too soon after cutting, and grain coming to the elevators in the future will probably show a smaller moisture test.

On account of the shortage of feed the Government has arranged to have feed (hay, straw and feed oats) transported free of freight charges.

The Government is anxious to know as soon as possible the quantities that each municipality will require and the council requests that each ratepayer who requires feed, inform his councillor or the Secretary-Treasurer of his requirements.

The price of this feed is not yet known, but must be paid for at the time of the ratepayer taking delivery.

Many here are preparing for the shooting season which opens on September 15th and continues till December 14th. The open season for Hungarian partridges and prairie chicken is from Oct. 1st to Nov. 15th.

Miss Mable Falow is teaching at the Lake Vernon school beginning with the term starting September 3rd. The many friends of Mrs. Matthew Lockhart will learn with regret of her illness.

Mrs. Lockhart has not been well for some time and is at present in the hospital at Viking.

It will be remembered that Mrs. Lockhart and her husband for many years resided in the Jarro and Kinsella districts before moving to Edson, where Mr. Lockhart conducts a blacksmith shop.

Mr. R. T. Meakins, painter and decorator of Jarro, has completed the painting of the E. C. Williams house at Kinsella.

Miss Alberta Edmy, of Edmonton, has been visiting with relatives and friends at Jarro and Kinsella for the past two weeks. Miss Edmy is employed by the La Fleche tailors at Edmonton.

A Kitchen and Basement Shower will be held in the United Church on September 12th at 3 o'clock, under the auspices of the Kinsella Women's Institutes. Tea will be served.

The community learns with regret of the serious illness of Mr. Harry Dennison and it is hoped that Mr. Dennison will soon be in his usual good health again.

Miss K. Ferries, daughter of Mr. and Mrs. W. L. Ferries, general merchant at Kinsella, is again teaching at the Park Hill school two miles south of Lougheed.

Messrs Hallerowit and Burrows, recent arrivals from England under the Hudson's Bay settlement scheme, left this week for Saskatoon to obtain employment.

HOTEL IN TOFIELD SOLD FOR 30,000

One of the best hotels in the Edmon district changed hands on Friday when James D. Hannan sold his Royal Alexandra hotel, Tofield to Thomas L. Malcolm, for \$30,000. Ge. McDonald, well known Edmon real estate man, handled the deal.

The hotel is a 40-room structure, of cement block and brick construction, and was built in 1913. It is a three storey building.

Both principals in the deal are well known. For Mr. Hannan, in addition to operating his hotel, had other interests in the Tofield district, including a large farm.

Mr. Hannan was at one time proprietor of the King Edward hotel at Viking.

UNLIKELY GENERAL ELECTION WILL BE HELD BEFORE 1931

That Premier MacKenzie King will not go to the country in a general election until 1931, upon the expiry of the federal government's full five year term, seems definitely settled, particularly with the news Friday of the apparently inspired announcement from London, England that the much talked of imperial economic conference to be held next year will be staged in Ottawa in June or July.

## The Wastebasket

"How dare you swear before me?" said a local young lady indignantly when her fellow dropped a cuss word while changing a tire when they were out riding one evening last week. "Pardon me, I didn't know that you wanted to swear first," he replied.

"Oh doctor, I am positively all run down, and I have that tired feeling all the time," said a lady patient at a Tofield doctor's office last week. "No doubt. Let me see your tongue," he replied.

The latest definition of love among the young men is that feeling that a fellow gets when he thinks almost as much of some girl as he does of himself.

"I want our son to go to go to college so that he will be college bred," said a local lady to her husband. "Yes, but it will be a four year loaf," the old man said.

There was a young lady of Camrose who got up before her dad or mom rose, But she went back to bed And pillowed her head, And remained till the fumes of the ham rose.

"There's a girl who holds her licker bell," said an observer at the post-office when he saw a girl stamp a lot of letters.

Men who must be capable of good head work — barbers.

Marriage to most girls is like a telephone, says a careful observer. Who got up before her dad or mom rose, But she went back to bed And pillowed her head, And remained till the fumes of the ham rose.

Something to worry about—the hump man has a biting power of 171 pounds.

"What shall we give mother for her birthday?" asked a dentist's wife in a neighboring town last week. "Tell her that I will extract her teeth for nothing," replied her husband.

"I am afraid that Johnny is getting lazy," said a local mother to her husband about their son. "He lays around and gets neighbors boys to do everything for him." "Lazy nothing," the old man replied, "he's merely showing executive ability."

This new corn-stalk paper is all right—but it has its drawbacks. Not very long ago a dairymaid attempted to deliver several reams of this paper to the Times at Wetaskiwin. The door was locked, so the dairymaid just left it in front of the office. A cow wandered down the street and had a wonderful feast off this new feed paper. The owner of the cow took her home, milked her as usual and delivered the milk. The next day all the milk customers were spitting paper wads.

It is reported that a local fellow and his sweetheart have had a serious falling out. She presented him with her photograph and he, on his bended knee, swore he would always wear it next to his heart. While making his last Sunday evening call he pulled out his hankerchief from his back pants pocket, and the photograph fell at the lady's feet! She says he is either a liar or his heart is not in the right place.

LOCAL GIRL'S PRAYER  
Backward, turn backward, oh time in your flight,  
Make me a girl again just for tonight.  
Give me the long golden curls that were worn,  
Back in the days before tresses were shorn.  
Give me the skirts that brought many a laugh  
When boisterous winds flipped them over the calf.  
Give me the roses our cheeks sported then  
Without touchings up from old Five and Ten.  
Give me petticoats; give me the lace;  
Give me the modesty; give me the grace;  
Give me the power to blush when I'm kissed;  
Give me the things I lately have missed.  
I have the gimmies. Oh, time in your flight,  
Give me the girlhood, please—just for tonight.

## Britain and Canada

Canada is honored at the present time by having among its visitors three notable British statesmen, Hon. J. H. Thomas, Minister of Employment in the Ramsay MacDonald Government; Hon. Winston S. Churchill, former Chancellor of the Exchequer, and Mr. Amery, former Minister for the Dominions. Mr. Churchill and Mr. Amery are in Canada on holiday, but they are none the less closely studying conditions and ascertaining the sentiment of this country in regard to vital questions of Empire policy such as immigration, trade and commerce, and the possibilities of closer relationships in matters for the general advancement of both Mother Country and this Dominion.

On the other hand, Mr. Thomas' visit to Canada is made in his official capacity as Minister of Employment, with the object of endeavoring to find out in what ways Canada can assist in solving the serious unemployment problem in Britain without doing injury to itself, and, having discovered, or evolved, ways and means to accomplish this object, to secure the co-operation of the Canadian Government and the Canadian people in carrying them into effect.

Fortunately, the first impression created by Mr. Thomas' mission has been removed. As the minister charged with the task of solving the unemployment problem in Britain, it was felt that Mr. Thomas was coming to Canada with the idea of developing some immigration policy whereby large numbers of British unemployed would be transferred to this Dominion. Anxious as Canada may be to have a large proportion of its incoming settlers of British birth, this Dominion is not prepared to have thousands of men dumped into the country solely because they cannot find work at home and who have no training or aptitude for life in this land. Mr. Thomas has made it abundantly clear that he has no such intention; on the contrary, Mr. Thomas declares: "It is not my aim to solve my unemployment problem by creating one for you." Unemployment and immigration, he says, are quite separate and distinct problems and should be tackled as such.

Then what is Mr. Thomas' proposal to Canada? It is simple, clear-cut, workable, and one that should find favor with, and the sympathetic support of the people of Canada. In a word it is that our large Canadian corporations, and our people generally, should, when making purchases buy British-made goods and articles, if such are not made in Canada, in preference to buying from any other country. He has asked the Dominion Government to give encouragement and support to such a policy. He has sat down in conference with the heads of the Canadian Pacific and Canadian National Railways and asked them to follow such a policy, he has said to the officials of the Canadian Wheat Pool: "Britain is the largest purchaser of your wheat. We are your best customer, just as we are Canada's best customer. Thus, when you require machinery or other things which Canada itself does not manufacture and cannot supply, we ask you to buy from us, rather than from others."

This should appeal to the people of Canada as good business. It is a self-respecting proposal for both parties to it. For example, Mr. Thomas points out that Canada imports over 16,000,000 tons of coal from the United States. He wants, he says, to get some of that coal business for Britain, Canada's best customer, and thereby assist the coal mining industry of the Old Land and supply work for some of the thousands of unemployed miners there, as well as cargoes for British boats, thus providing employment for British dock hands, sailors, and all and sundry having to do with the business of shipping.

Such a policy will strike a responsive chord with the people of Western Canada, who are not particularly favourable to any policy of restrictive tariffs, or other forms of restraint on trade, and who firmly believe that the proper policy for this Dominion is to open its doors to action by other countries against Canada by further reducing tariffs on British goods and thereby assisting to substitute British-made goods for those of other countries.

The success of such a policy lies largely with the individual Canadian citizen. He can make it a success by stipulating when making any purchase that, first, he must have an article made in Canada, and, if that cannot be obtained, second, that it be British-made. Importers, wholesalers, distributors, retailers, will quickly adjust their stocks to comply with the popular demand.

Leaving all sentiment aside, it is good business for the people of Canada to support and buy from their best customer. The more we buy from Britain, the more Britain can afford to buy from us.

### Silver Dollar Out Of Date

**Fifty Million In U.S. Treasury But No Demand For Them**

The silver dollar has joined the horse and buggy and other remnants of the past and has faded from circulation, while the silver half-dollar is still used in the West, but is going out of use in the East, because quarters are favored for tipping, according to U.S. Treasury officials.

At the present time there are about 50,000,000 silver dollars tied up in the Treasury to back up silver certificates, although they could easily be placed in circulation if there were a demand for them.

### New Car For King George

**Has Six Wheels and Will Travel Over Rougher Roads**

A six-wheeled motor car built to go anywhere on land has been delivered to the King at Sandringham, Norfolk. It is an all-British production designed to travel over the roughest roads and broken ground and even over ploughed land, while it can travel at 60 miles an hour on the open road. The car has detachable rubber "caterpillar" treads, for really rough ground.

The proposed canal across Nicaragua, to link the Atlantic and Pacific, would be bigger than the Panama Canal.

A new type of lifeboat, recently tested in British waters, holds 300 passengers and is equipped with radio.

Any job is easy when you like it and hard when you dislike it.

### Stop Sneezing

Nip that cold in the bud with Minard's Heat and Inhalant.

W. N. U. 1802

### Was Victim Of Glacier

**Body Of Austrian Recovered After Eighty-Three Years**

Eighty-three years ago, Norbert Matternberger, at the time 32 years old, husband of Magda, and father of Franz Otto, failed to return to his cottage, in the village of Kals, Austria, one day from the woods, where he won his living hunting game. A rescue party from the village decided he had been caught in an avalanche of ice.

Recently Matternberger came home just as he left that day in 1846. The glacier had given up its prey. Although clean shaven, according to family records, when he left, he had a two-inch beard when a party of hunters found him on the edge of the glacier. The body, clothes, and weapons were in a perfect state of preservation.

Franz Matternberger is now 86. His father was buried at Kals, while grandchildren and great-grandchildren mourned at his grave.

### WHAT OUR GIRLS NEED

**When Languid, Anaemic and Feeling Run Down**

When a girl grows languid, dull and irritable, when her color fades and she becomes pale, you may be sure that the cause is anaemia, or impoverished blood. The bright, red color of the blood is caused by the presence in it of millions of tiny red corpuscles. It is these tiny bodies that carry nourishment from the blood to the tissues. They also carry the glow of health in cheeks and lips. When a girl's blood is deficient in these red corpuscles her body is undernourished, her nerves starved, and there is serious danger of a decline. What is needed is an improvement in the quality of the blood, and it is a scientific fact that a course of Dr. Williams' Pink Pills will so enrich and purify the blood that all traces of anaemia and its accompanying weaknesses will disappear. As an evidence of the value of Dr. Williams' Pink Pills in cases of this kind, Mrs. John Finnan, Howland Station, P.E.I., says: "I am glad to take this opportunity of recommending Dr. Williams' Pink Pills. My daughter was in a badly run down condition, very pale, nervous and much under weight. I tried several medicines, but they did not seem to do her any good, so I decided to give her Dr. Williams' Pink Pills. Almost from the start she began to improve, and after the use of a few boxes she had gained weight, her appetite improved, and she had a better color in her cheeks. In fact she had fully regained her former health. I would advise every mother of young girls to give them Dr. Williams' Pink Pills at the first sign of an anaemic condition. You can get these pills from any medicine dealer or by mail at 50c a box from 'The Dr. Williams' Medicine Co., Brockville, Ont.'"

### World Harvest Larger

**Wheat Acreage in Many Countries Increased in Last Year**

Present indications are that the world acreage of wheat to be harvested in the season 1929-30 will be larger than that of last year. The 1929 wheat acreage in 21 countries is estimated to be five million acres larger than in 1928. Areas reported in all European countries total 56,562,000 acres, an increase of 1.4 per cent. over last year.

Worms in children's work havoc. These pests attack the tender lining of the intestines and if left to pursue their ravages undisturbed, will ultimately perforate the wall, because these worms are of the hook variety that cling to and feed upon the interior surfaces. Miller's Worm Powders will not only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

Chinese writers state that in the third century B.C., China had wide highways lined with shade trees spaced at intervals of thirty feet.

An Indian spider's web, only six inches wide, was found to contain over 41,000 meshes.

### Cramps Diarrhoea Pains in Stomach

Mr. Roy Lightbail, Milford, Ont., writes: "I became very ill; lost my appetite, had cramps, diarrhoea, and severe pains in my stomach."

"I purchased a bottle of D'FOWLER'S EXT-O-F WILD STRAWBERRY and before I had taken half of it I was completely relieved, and have had no symptoms of the trouble since."

"I cannot praise 'The Extract' too highly, and will never be without a bottle of it in the house. It is pleasant to take and acts very quickly."

"My brother had the same experience with it as I had."

"Dr. Fowler's has been on the market for the past 84 years; you don't experiment when you buy it. Price 50 cents a bottle at all dealers; put up only by The T. Millburn Co., Ltd., Toronto, Ont."

### Wonderful Discovery

**Of German Experts**

**Treatment Given To Living Trees Makes Lumber Fireproof**

A thin mineral soup, fed to living trees to make their wood partly fireproof after it has been cut and made into boards, has been invented by experts of the College of Forestry, at Tharandt, Germany. The process is a modification of one invented some time ago to dye the wood of a living tree to any desired colour. For this purpose solutions of the desired dyes were placed in holes bored in the tree close to the ground. As the sap rose the dye went with it, gradually colouring the wood. In the new fireproofing process, the dye solution is replaced by a bowl of the new "soup" containing compounds of silicon and fluorine and other chemical elements, so arranged that the solution flows little by little into a hole bored in the tree trunk. As with the dye solution, these chemicals are absorbed slowly by the tree and carried up by the rising sap into every fibre of the wood. The solution is too diluted to damage the living cells of the tree. Instead, its chemicals are gradually converted into mineral deposits throughout the wood, such as happens in the centers of millions of years to wood buried in mineralized ground and slowly turned into stony fossil. To carry this mineralizing process, too far in the trees intended for timber is unwise, since the mineral deposits make the wood harder to saw. The German experts claim to have succeeded, however, in mineralizing trees just enough to make their wood almost fireproof without destroying its properties as wood.

### Might Be Good Idea

**Everyone in Japan Compelled To Carry Identification Disc**

"Where's your identification disc?" In the near future you may be stopped by a policeman and asked this question. And if you can't produce the disc, it may mean a police court summons and a fine around the neck. Answers. This may sound far-fetched, but a coroner remarked the other day that it would be a good thing if everybody carried an identification disc of some kind, and was informed by a police officer that this was compulsory in Japan. There everyone carries such a disc around the neck from birth onwards. Apart from the convenience in accident cases, it would also be a safeguard against loss of memory, of which there have been many instances.

**Sores Free Before It.** There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Electric Oil. All skin troubles should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

### Two Diplomats Honored

**Several Canadians Also Received Honorary Degree At Dalhousie University**

America's minister to Canada, Hon. William Phillips, and Canada's minister to the United States, Hon. Vincent Massey, were among those receiving honorary degrees at Dalhousie University's reunion convocation. Other distinguished men to be honored were Hon. E. N. Rhodes, P.C., Premier of Nova Scotia; Hon. A. K. MacLean, president of the Exchequer Court of Canada; Col. the Hon. J. L. Heston, Minister of National Defence and Chief Justice A. M. Morrison, of the Supreme Court of British Columbia.

**Mother Graves' Worm Exterminator** will drive worms from the system without injury to the child, because its action, while fully effective is mild.

### New Company Organized

**Will Manufacture Briquettes From Dried Coal in Souris District**

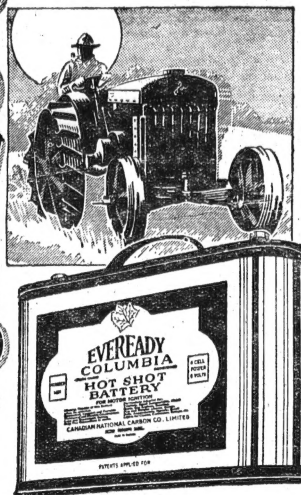

The Canadian Coal Briquettes & Power, Ltd., has been organized by a number of prominent financiers and coal men in western Canada to manufacture briquettes from the dried raw coal of the Souris District of southern Saskatchewan. Dried lignite coal and powdered fuel will also be manufactured. The company, it is stated, owns 800 acres of coal in the Souris District with an estimated tonnage of 8,000,000 tons.

Miss Oldsayer: If I should lose all my money would you love me just the same?

Mr. Seadhunter: Just the same, my dear, only I'd be so busy earning my living I wouldn't be able to notice it.

Kill that corn with Minard's Liniment.

**POWER**

Unconquered by days of heavy toil. Pull of fire for the next tough ignition job — Eveready Hot-Shots have made themselves a national reputation for sheer strength and long life. Metal cases shed water — keep out penetrating damp and save battery power. Look for the name Eveready on each battery—if it's not an Eveready, it's not a genuine "Hot-Shot."

### Must Attend School

Two of the carriage horses recently presented to the King and Queen of England, Caesar and Castor, must attend school and take music lessons before they are allowed to state possessions. They are "schooled" in the riding school of Buckingham Palace in the midst of clamor and noise similar to that created by bands and crowds during public demonstrations.

**Minard's Liniment—Used for 50 Years.**

Young Persian army officers are said to prefer motorcycles to Arabian steeds for pleasure riding.

### Southern Alberta Beet Crop

"The Southern Alberta beet crop, from present indications, especially from the Raymond District, promises to be the largest tonnage on record," says the Lethbridge Herald. "Despite the reduction in acreage due to loss from heavy rains and floods during the early spring. The remarkable growth helps to offset the difference, and the beets thrived under the oppressive heat of midsummer."

The Canadian post office carries 600,000,000 letters, 350,000,000 newspapers, and 400,000,000 parcels a year.

### Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh...delicious! Para-Sani keeps them from staling. Get Para-Sani in the handy, sanitary knife-edged carton. For less exacting uses ask for Appleford's "Centre Pull" Packs in sheet form.

## Vision of Mineral Wealth of Western Provinces Is Seen From Initial Development

Speaking of the immense possibilities of the northern parts of the provinces of Quebec, Ontario, Manitoba and Saskatchewan in the production of mineral wealth, Dr. C. V. Coates, in an address to the Winnipeg Board of Trade, recently stated that Canada would never be appreciated until the people learned to turn their eyes to the north, for it is there that they will find the largest quantities of that without which the progress of civilization would be sadly hampered, if not halted altogether, namely minerals.

Minerals form the basis of progress today, for the material side of our modern scientific civilization depends for its progress on man's increasing knowledge and skill in their use. And so the strength and economic success of modern nations are largely conditioned on their successful exploitation of mineral wealth. The world's growth in population may be controlled by its hitherto resources, man must be fed and clothed before he may advance, but its material progress is measured rather by man's growing success in shaping its mineral resources into forms to suit his own purpose.

With the opening of the vast mineral-producing areas in the northern part of Manitoba and Saskatchewan, though the work has only been begun, comes a partial realization of the potential wealth contained in these two provinces in districts hitherto thought to be of little value beyond the timber and fur. The discovery of the presence of mineral-bearing formations in the rock gives promise of another mining area such as has been developed in Northern Ontario.

Nothing could bring greater benefit to the agricultural industry of the West than the development of a flourishing mineral industry, with its large sums of circulating capital enervating the economic system in all directions. Such sound development would provide a ready market for the products of the farmer, who is now so seriously hampered both by the remoteness of his market and by the limited variety of those products which can stand the present long transportation cost.

Nor would anything quicken the activities of western towns and cities more than the opportunity to supply the many other needs of a flourishing mineral industry and of its numerous workmen and staffs, who, unlike the farmer must purchase one hundred per cent of their daily needs. This country's greatest economic need today is more balanced industries, the creation of internal exchange of goods by the development of more varied industries, a happy condition which will never be fully enjoyed until there is set in motion a long chain of industries having their starting point in the minerals of the earth's crust.

As in the case of Northern Ontario, some of whose greatest mineral deposits were discovered only when the railroad was being pushed through the wilderness railway system in the northern parts of Manitoba and Saskatchewan is leading to the discovery of still further deposits of potential wealth, some of which are already being converted into actual cash by those in charge of the development. Then, too, the more the lines of steel are pushed ahead in this country, the more it is made readily accessible to the prospector and still more accessible to that just as important person, or persons, the promoter who develops what the prospector has found.

Before the end of 1928 an eighty-eight mile branch railway, which was essential for the development of the area, was completed from the Hudson Bay Railway. The mine plant under course of construction and

which will take about four years to complete, will include flotation mill, with cyanide annex, copper smelter and electrolytic zinc plant. It is expected to mine and treat 3,000 tons of ore a day. Hydro-electric plants and transmission lines will also be erected and it has been announced that the Island Falls site on Churchill River will be utilized.

In 1915 on the north-west arm of Schist Lake, and about four miles south-east of Flin Flon Lake another discovery was made. A year later diamond drilling disclosed an ore body of about 25,000 tons of massive chalcite-pyrite, averaging about 20 per cent copper with additional gold and silver values of \$5 a ton, and about 180,000 tons of lower grade copper-zinc sulphide ore. Very soon after its discovery, this property was taken over by a company. During the war years this company took advantage of the high price of copper and the richest part of the ore was accordingly mined out and shipped to smelter at Trail, British Columbia, for treatment. Although involving unusual transportation costs, 25,000 tons were moved from 1917 to 1920 inclusive. The value of this copper exceeded \$2,000,000, and the recovered gold and silver approached a large figure.

Prospectors in 1914, working eastward from Amisk Lake and westward from Hudson Bay Railway, found many indications of free gold in quartz veins occurring on the shores of Wekusko Lake, also known as Herb Lake. Hundreds of claims were staked and considerable development resulted. Number of companies were formed.

Many important discoveries of minerals in all parts of this great belt have followed the spreading out of the prospectors and scarcely a day goes by without a new discovery. One of the biggest, or possibly the biggest ore body yet found, is the Sherritt-Gordon copper-zinc deposit on Cold Lake, otherwise known as Klondike Lake, about forty miles north-east of Flin Flon Lake.

Development to date has definitely placed this property in the big mine class and an off-shoot of the Flin Flon branch railway is expected to be constructed during this year from Cranberry Portage to the mine, a distance of about forty-two miles. Arrangements for the construction of a 1,500 ton concentrator were recently announced which, it is expected, will be ready for operation by January, 1931. Production from the Sherritt-Gordon is only a matter of time, a strong company having been formed to carry out the developments.

So the justified rush to the North has opened up an area which seeks the hand of friendship from the South.

### Will Develop Amber Deposits

Amber and Ochre Beds in Northern Manitoba To Be Worked

A new branch of mining in northern Manitoba is a likelihood next spring with the announcement that a syndicate will develop the ochre and amber deposits at Cedar Lake. The company is known as the Charland Syndicate, and operations are expected to start this winter.

Staking of properties will be completed by this fall. Adequate finances are in sight for the development, it is stated by officials of the company.

Delay in operations has been caused by the fact that there are no regulations governing the dredging of amber. It is understood that the syndicate is progressing satisfactorily in its negotiations with the authorities and that dredging licenses will be granted.

Surveys have shown that the major part of the bed of Cedar Lake is composed of an amber deposit, the result of the decay of an ancient forest. A paint and varnish firm in the United States has been investigating the possibilities of the ochre deposit, and a deal for the sale of the output in northern Manitoba is probable.

### That Kind Of A Loan

"A Kathleen Mavourneen loan?" questioned a judge in an Irish court. "What in the world is that?" "That's what we call some loans in our parts," the witness replied. "They are the 'It may be for years and it may be for ever' sort."

Arkansas, Florida, Mississippi, and South Carolina are the only four states in the Union without some measure of protection for their workers against industrial accidents.

## Win Scholarships

Canadian Pacific Railway scholarships covering five years' tuition at McGill University, have been awarded to C. P. Sturdee (left), son of E. F. L. Sturdee, assistant general passenger agent; and William P. Dunlop, son of John Dunlop, in the pension department of the railway. These young men have both done brilliant work in their respective school careers and closed them by making the highest average in the matriculation examination for entrance to the university. As minor sons of C.P.R. employees they won the right to the scholarships awarded them.

### Demonstrates "Safety-Plane"

New Autogiro Makes Perfect Landing In Series Of Tests

Dropping from the skies in an almost vertical position and landing as gently as a feather floating to earth, the new autogiro "safety plane" of the Spanish inventor, Juan De La Cierva, was put through a series of successful tests at Philadelphia. The pilot made a half-dozen trips and each time came down almost vertically within a few feet of the point from which he started. Thus demonstrating, he said, the ability of the plane to land safely if the motor should suddenly go "dead" while the plane was in flight.

Musk ox and reindeer can live in the same area without interfering with each other's food supply, because the food eaten by one is avoided by the other.

### Shipping Eggs Via Panama

Trial Shipment From British Columbia Was Very Successful

The success attending a small trial shipment of British Columbia eggs to Great Britain last year will result in much larger exports being made this season. Some 13,000 cases were already been booked, and 8,000 cases were packed to leave Vancouver on the Dominion Line "Gragalia," via the Panama Canal. W. H. Auld, chief egg inspector of the Dominion Fruit Branch, who visited Vancouver in connection with the shipments by this route, predicts that as a result of the establishment of the British Columbia Egg Pool shipments will shortly assume considerable volume.

Sergeant: "Hey! You can't go in there—that's the colonel's tent!" Kookie: "Then what have they got 'Private' over the entrance for?"

## FASHION

No. 303—New Elegance. This style is designed in sizes 16, 18, 20 years. Size 36 requires 2 1/2 yards of 40-inch material with 1 1/2 yards of 40-inch contrasting.

No. 289—Flattering Neckline. This style is designed in sizes 16, 18, 20 years. Size 36 requires 3 1/2 yards of 40-inch material with 3 yards of 40-inch contrasting and 4 yards of binding.

No. 783—Graduation Dress. This style is designed in sizes 8, 10, 12 and 14 years. Size 8 requires 2 yards of 40-inch material.

No. 981—Attractive Junior Frock. This style is designed in sizes 6, 8, 10, 12 and 14 years. Size 8 requires 2 yards of 40-inch material.

No. 833—Smart Apron and Cap. This style is designed in sizes small, medium and large. The medium size requires 2 yards of 30-inch material with 5/8 yards of binding.

## Plans Being Formulated For Canada's Participation In The Antwerp International Exhibition

### Canada Urged To Look After Forests

Method Is Criticized By Editor Of Empire Journal

A strong indictment of the forestry methods used in Canada is made in an issue of the "Empire Forestry Journal" by Fraser Story, the editor. After referring to the ever-growing needs of the Empire for soft woods, the writer points out the magnificent white pine forests of Eastern Canada are gone and the lumber industry is now concentrating on the great forests of the West. "The treatment of old stands and the neglect and abuse of young growth, in spite of the efforts of the forestry service, the absence of care in the abstraction of produce and the large percentage of waste come as a shock to European forestry," he writes.

"Generally speaking," he continues, "no effort is made to restock cleared areas with profitable species. During logging operations all valuable conifers are removed while fire nearly always breaks out in the debris and burns any that remain."

"Valuable coniferous forests are succeeded by practically worthless trees, which are in their nature weeds. What makes matters worse is the tendency to cut down young trees for quick sale."

"The lack of regard for future crops seems to be principally due to thoughtlessness. Canada will, no doubt, always have a sufficient supply of soft woods to satisfy her own needs, but as an Empire supply she is a failing source."

### Air Mail For North

Regular Service To Be Established In Northern Alberta

A notable extension to Canada's rapidly growing air mail services will go into operation early in November, when regular air mail service will be inaugurated by Postmaster-General P. J. V. Bennett, between Fort McMurray, Alberta, and Alkavik, N.W.T., near the mouth of the Mackenzie River.

This route, which will almost parallel the historic fur traders' trail for nearly 2,000 miles north and northeast, also connects the Athabasca, Slave and Mackenzie Rivers, penetrates farther north than any other regular air mail service in the world and brings a remote but important region of Canada's vast north land close to the main arteries of traffic, also greatly increasing the frequency of communication. The winter transportation difficulties in this area have been such that it has been necessary to depend chiefly upon dog teams for mail services. The coming of the mail plane reduces days to hours and confers an inestimable benefit on the inhabitants. There will be 14 points of call on the route, including Fort Resolution, Fort Providence, Fort Good Hope and Alkavik itself.

### Sweep Of Prizes

Capload Of Manitoba Livestock Sets a Record At Western Fairs

The greatest sweep of prizes ever made by a carload of livestock from Manitoba, the records set by Alex McPhail and Herb Clark, of Brandon, in their showing of swine over the Western Canada circuit of exhibitions. Concluding their trip at Regina, the local exhibitors found themselves in possession of 83 firsts. Forty-three animals were included in their showing, and at Calgary, Edmonton, Saskatoon, Regina and Brandon, they met keen competition but were successful in practically every event they entered.

### A Lonely Town

The loneliest village in England is in Oxfordshire. This town is only five miles from Oxford, yet its many agricultural inhabitants have never seen a train and few have attempted a tortuous trip into civilization. Because of its isolation, supplies cost the local villagers much more than they should.

### Planning Another Flight

Another Graf Zeppelin flight to America is planned for October, according to a Friedrichshafen despatch to the Telegraph Union. The despatch added that the great dirigible was expected to return to Friedrichshafen on Sept. 10.

He: "Don't go. You are leaving me entirely without reason." She: "I always leave things as I find them."

Plans are now being formulated for Canada's participation on a princely scale in the Antwerp International Trade Exhibition of 1930, which will be the fourth occasion on which Canada has taken part in a leading Belgian Exhibition.

The three previous occasions were at Liege, in 1905, Brussels, in 1910, and Ghent, in 1913. Until recently it was thought that Canada would take a space in the British pavilion at Antwerp, but so important is Canada's growing trade on the Continent becoming that the Canadian Government decided on participation separate from the British exhibit and in an entirely Canadian pavilion.

This has been designed by J. O. Turcotte, Canadian Government Exhibition Commissioner, and will take the form of a building 200 feet by 50 feet in the modern style, advantageously situated between the French Section and the Amusement Park. The building will be constructed of steel and reinforced concrete with special soft roof lighting. The entire decoration, which is on a most lavish scale, is being prepared at the Canadian Government Exhibition warehouse at Hampstead, and consists of continuous transparent frieze, nearly 500 feet long, with a special illuminated background portraying Canada's productive resources from Atlantic to Pacific. Visitors will be able to take in at a bird's eye glance the products and methods of Canada's farms, fisheries, mines, forests, factories and mills.

All advertising matter will be published in French, Flemish and English, and all efforts will be centred on presenting Canada as a composite whole and not by individual provinces.

### All Accredited Stock

Great Demand At Vergereville Hatcheries For Baby Chicks

Ninety thousand baby chicks were sold from Vergereville Hatcheries, Ltd., at Vergereville this year, all of them from eggs selected from accredited flocks. This enterprise was started on capital supplied by about twenty local men and is a purely commercial hatchery. In addition to this they brought in baby chicks from British Columbia to fill orders they were not in a position to supply. The capacity of the hatcheries is greater than the 90,000 produced this year and with the perfecting of one of their incubators, a home-made product with a 100,000 egg capacity, and the development of their markets, it is probable that the business will develop greatly during the next season.

At present in addition to the 100,000-egg incubator, there is also a 150,000-egg electric incubator. Will J. Gould is operator and manager and the district agricultural F. H. Newcombe has been an active agent from the beginning of the enterprise.

The scheme started as a result of dissatisfaction over the different standards in judging birds and an increasing feeling that the poultry business should be raised to a more business-like proportion having its proper place in farm activities. This could not be done until farm flocks were increased in number and improved in quality. There was little incentive to do this with a standard of perfection as one objective and standard of production as a counter objective or basis.

### China Planning Gunboats

The Observer's Shanghai correspondent, in London, reports that British firms are negotiating with the Chinese Government for the construction of gunboats costing several millions of dollars. Although the negotiations have not been completed, it has been arranged for eight Chinese cadets to go to Great Britain to receive instruction in naval architecture.

"Do people often fall down this abyss, guide?" "No, sir, never more than once."—Lustige Kolner Zeitung, Cologne.

"Shall we try what honesty will do in our business?" "No, I will have no more innovations."—Lustige Kolner Zeitung, Cologne.

## Produced 15 tons of milk

Strathmore Sylvia, prize pure-bred Holstein from the Canadian Pacific Railway Experimental Farm at Strathmore, Alberta, held the record of all Canada last year for her production of 29,371 pounds of milk and 1267 pounds of butter. She had her day-out at the Calgary Exhibition and Stampede at Calgary recently, when with others from the herd of 600 at the farm she was admired by thousands of visitors. Just to impress on them what she had done, 370 eight-gallon-milk cans were arranged around the entire Canadian Pacific Holstein exhibit, these being the number required to hold the milk Sylvia produced. 1267 one-pound butter cartons formed an arch at one end, emphasizing her butter production.

## VIKING

Aerial communication was established last week between Percy Reid of Viking and Harold Whidden of Jarow. The medium was a toy balloon a Collier Bros. Goodyear. Percy filled the little rubber balloon with some of the Viking gas and away into the clouds it went. Just what journey it took before landing at Jarow is not recorded. Percy had taken the precaution of placing his name and address on the balloon, and was notified by letter of the finding.

Mr. and Mrs. A. B. Crouse expect to leave on Monday for Edmonton where the Rawleigh Co., which he represents in this district will hold a training school for four or five days, ending up with a banquet at the Rose Room in the King Edward Hotel.

The provincial police have strict instructions to check up on all drivers of cars, trucks and motor vehicles of all kinds to see if the drivers have the proper licenses. Better carry the little piece of paper with you, or you might have to donate a five or ten to the government's coffers.

Capt. Floen and T. Kastberg, of Edmonton, were visitors in this community the first of the week. Mr. Kastberg is contemplating purchasing a hotel business in the Peace River country.

Miss Rowena Harris returned to Detroit, Michigan, last Friday morning after a two months visit here at the home of her mother Mrs. M. Harris southwest of town.

Mrs. R. J. Darrah and daughter Miss Maxine, and sons Robert and Douglas left last week for Vancouver, B. C., where they will remain for the fall and winter months.

Clem Loughlin was called to Winnipeg on Monday evening on receipt of the sad news that his father had died suddenly in that city.

Mr. and Mrs. Harry Cartwright motored to Chauvin and back again over the week-end for a visit with friends and relatives.

Mrs. A. H. Finch, of Swan River Valley, Manitoba, is visiting here at the home of her son, P. E. Finch.

Carl Finch was a week end visitor at the P. E. Finch home over the week end.

W. F. Goodwin made a flying trip to Edmonton last week.

Mrs. Chan Collins was a visitor in Edmonton over the week end.

Thieves entered the Viking meat market either Saturday or Sunday night and robbed the till of \$8.40 cash. A number of five cent pieces were left. Entry was made by prying open the screen window at the back of the building. The window has been left open most of the time serving as a ventilator. The loss was not noticed until Monday morning when the place was opened for business. The robbers unbolted the back door and walked out apparently without taking anything else with them.

Metcalfe and Collins wish to announce that they will move to the Viking Elks Community Hall on Friday and Saturday of this week and each successive week for the showing of the Viking Movies. Their opening programme will be an all star cast in "Blue Skies" a Fox Feature, also a Canadian Educational comedy entitled "No Fare."

An added attraction on the stage entitled the "Dotty Duo in Musical Digs" will be another diversion.

Next week, September 20th and 21st the "Tiger's Shadow" a serial, will be an added attraction to the usual programme, which also includes George Baneroff in "Underworld, and a Felix the Cat comedy, entitled "Wise Guise."

Don't forget the tennis club dance on Wednesday, September 18th in the Elks Community Hall. Everybody come and enjoy the evening in the new hall. The ladies have arranged to serve lunch.

## NEWSPAPER BEATS RADIO

Newspaper advertising proves more valuable than radio advertising by a ratio of 22 replies to one for a recent announcement of the Babson statistician Organization using both media. Roger W. Babson, business statistician and forecaster, told a lecture audience in Cleveland on May 27th.

One newspaper advertisement published in five cities at a cost of \$3,000 brought 222 replies to every one reply broadcast over the Columbia Network Mr. Babson said.

The broadcast was from 2:30 to 9:00 p.m., Saturday, May 18th, Mr. Babson said. A well known orchestra was used as the entertainment feature and there was a five minute talk on the Babson service. The result was 16 inquiries and two telegraphic orders.

The newspaper advertisement appeared on the following Monday in newspapers in Cleveland, Boston, New York, Philadelphia and Chicago. It drew 4,000 inquiries, of which 488 came from New York. Figures presented by Mr. Babson, showed that each reply from the radio cost \$166.66 while those from the newspaper advertisement cost 74c each.

## WORLD HAPPENINGS BRIEFLY TOLD

Regina was named as the scene of the 1930 convention of the Trades and Labor Congress of Canada. The western city defeated Hamilton by 109 to 75 for the honor.

Mrs. Jessie Campbell Ewart, wife of John S. Ewart, K.C., widely known authority on constitutional law and history, died at her Ottawa residence recently.

Montreal proper has now a population of 1,071,067, according to Lovell's Montreal Directory, the 87th volume of which is about to be published. The population of Greater Montreal is 1,224,659.

Vilhjalmur Stefansson, famous Arctic explorer, declares that the northern air route to Europe is the only practical one to develop and predicts that within 10 years' time there will be one day mail service from Winnipeg to London over the northern end of the world.

The Graf Zeppelin completed its 20,000 mile flight around the world in 21 days 7 hours and 34 minutes elapsed time. Actually flying time of the craft was 11 days 23 hours and 14 minutes, beating the time of 15 days and six hours made by the United States army world flyers in 1924.

### Making Amazing Progress

Use Of English Has Outstripped All Other Languages

The amazing growth of the English language, surpassing that of any other during the past 100 years, was illustrated by statistics compiled by a newspaper published at Zurich, Switzerland.

English was spoken by less than 20,000,000 persons in 1850, the statistics showed, while at present no less than 100,000,000 people speak it natively, while an additional 60,000,000 understand it but do not consider it their native tongue.

The newspapers said that the rate of increase far outstripped all other languages and that there is no part of the world where the language is not spoken today.

### Army Fights Locusts

Sixty-Five Tons Destroyed By People In Bulgaria

Every man and woman between the ages of 16 and 80 was recently mobilized by the government of Bulgaria to fight an extraordinary plague of locusts which were destroying crops in the Harvovo District of southern Bulgaria. Fire, smoke, and oil were successfully used in combating the pests, but more than 65 tons of the locusts were destroyed before their depredations were finally terminated.

"Did you cancel all my engagements, as I told you, Smithers?"  
"Yes, but Lady Millicent didn't take it very well. She says you were to marry her next Monday!"

France has seven million cyclists. It is the most popular sport in the country. An annual distance bike race is one of the big sporting events each year.

The ex-Kaiser is the richest German in the world. He found a way to make Germany pay before the Dawes plan was ever heard of.

### Aviators Had Hard Time

Had Almost Lost Hope When Rescued In Far North

After living eight days on berries between the God's Lake and Norway House, where they made a forced landing, R. Marshall and S. Harrison, Canadian Air Force aviators, are now recovering at Norway House. They were rescued by an air force plane recently when they had almost given up hope.

Their clothing was in tatters and they were painfully weak when found. They were on fire patrol when the motor stalled and landed on the lake, and struggled unavailingly the first day in an effort to make repairs. They remained near the machine and on the eighth day their frantic signals attracted another plane to their rescue.

### Poet's Ashes Return Home

Bliss Carman Laid To Rest In Family Plot At Fredericton, New Brunswick

The ashes of Bliss Carman, who was Canada's greatest poet, now rest in a concrete tomb at the family burial plot at Forest Hill Cemetery, Fredericton, overlooking the city where he was born.

The ashes were brought from New Canaan, Connecticut, where he died, to Fredericton, and committed to their last resting place following a memorial service arranged by the Government of New Brunswick, and attended by distinguished men and women from many parts of Canada and the United States. One of Carman's best known poems was sung during the service at Christ Church Cathedral.

### UNIQUE SPORTS TYPE

It's slender, trim and wearable. It rather suggests a draped treatment, entirely smart and new. Style No. 560 is a boon to the woman with a stout figure. It conceals overweight without a tell-tale. Just see how the surprise closing bodice with shawl collar carries the line down to straight closing of skirt. It gives the figure flairs. At each side of front, inverted plaits add necessary width to hem. They are topped by pointed patch pockets with envelope flaps. The back is perfectly straight. It is a model that adapts itself beautifully to all the smart cotton fabrics as printed pique in red and white pin dots with white pique contrast as sketched. Yellow sportswear linen, peach shantung with white, green and white checked gingham with green organdy, orchid and white gingham check in cotton voile with white organdy and shell-pink washable flat silk crepe. It is designed in sizes 16, 18, 20 years, 26, 28, 30, 42, 44 and 46 inches bust measure. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

FOR COLIC, CONSTIPATION, INDIGESTION

### A Great Mathematician

Professors Amazed By Rapid Mental Calculation Of Young Russian Woman

The world's most marvellous woman mathematician has been discovered in the person of Nina Glogoliva, 22 years old, who does in her mind, in from two to 20 seconds, mathematical problems which require hours of experts to do, in the ordinary way, with pencil and paper.

This wonder woman has been discovered after a wide survey, and scientists are amazed at her lightning-like mental calculations. Before a commission, consisting of Professor Kuznetsov and Professor Chajovsky, mathematicians; Kojinsky, the engineer, and Dr. Kiselef, a physician; Miss Glogoliva, with apparently little effort, extracted the root in the ninth degree of numbers with as many as 20 digits. Squaring and cubing numbers of 9 or 10 digits seemed no harder to her than the multiplication table to ordinary humans.

Her memory is remarkable and she can repeat, having heard them only once, long lists of words in languages she does not know. The commission pronounce this woman of Russian birth, greater than Arago or other prodigies on record.

### May Make Icebergs Visible At Night

Expert Making Series Of Experiments To Ensure Safer Navigation

Dr. Howard T. Barnes, internationally known ice-engineering expert, was at McGill University for a few days while his experimental ship, "The Ulvira," was undergoing repairs and waiting before starting out for a series of experiments in the Bay of Fundy.

Dr. Barnes stated that he had just completed three weeks of experimental work in the detection of icebergs at night in the vicinity of Newfoundland and Labrador, doing considerable photographic work for further experimental study in the laboratories at McGill.

To develop methods of making the icebergs visible at night is the objective of Dr. Barnes' present investigations. If he is successful, ships will be able to proceed at full speed either in darkness or fog in the vicinity of icebergs without danger of collision. This he hopes will make the St. Lawrence route to Europe even safer than at present.

### Petition For New Judicial District

Very Necessary To The Pas Say Members Of Bar Association

Members of The Pas Bar Association will petition the provincial government to make a new judicial district there comprising all the territory north of Township 44, in Manitoba, according to a decision made at a meeting of the barristers.

It was pointed out that it was of great importance to The Pas to have a judicial district. "The lawyers do not ask that a resident judge be appointed, since the amount of work is not sufficient to make such a course necessary, but they do feel that, in the interests of the north, a judicial district here is necessary."

### When Breakfast Is Ready

Punch's famous advice to those about to get married has been equalled, we believe, by the American publication, "Life," which reports a husband as saying to his wife: "Well, I hear you scraping the toast, so I suppose breakfast is ready."—Toronto Mail and Empire.

First Traveller—I hear they aren't sending any more mail to Washington.  
Second Traveller—How's that?  
First Traveller—He's dead.

The human body generates enough heat during a day to melt 44 pounds of ice and raise the liquid to boiling point.

The average life of an oil field is about three years.

A butterfly in flight beats its wings nine times a second.

### New Means Of Solving Crime

Creator Of Sherlock Holmes Speaks Of Impressions Of Mediums

In the well equipped police station of the future a trained clairvoyant would be part of the detective department, according to the creator of "Sherlock Holmes."

Sir Arthur Conan Doyle discussed the possibilities of a clairvoyant or a psychometrist helping in the solution of the Rohstein mystery and other puzzling cases confronting detectives throughout the world. He envisioned a day when criminals would have to destroy everything used in carrying out crime, otherwise a psychometrist would "detect" clues and hand them to detectives.

"Although I do not think anyone could ever be convicted on the knowledge or evidence of a clairvoyant, I do believe the latter can find clues where the police fail," Sir Arthur said.

The proper term is psychometrist, the work having nothing to do with spiritism. It is purely a matter of the medium's own latent powers."

Sir Arthur gave as an example the finding of a blood-stained knife. The psychometrist, called to the scene, would inform the detective that he had a strong impression of a man with a long black mustache, wearing a brown suit."

According to Sir Arthur this would give the detective something to work on, as no matter how shifty the detective was, he could not have received an impression of the man's appearance from seeing the knife.

### Western Air Mail

Expected That Service Will Commence About First Of November

Present indications are that, air mail service in the west will commence about November 1. G. Herring, of Ottawa, superintendent of air mail service for the postal department, stated in Saskatoon. The service will connect Winnipeg, Edmonton and Calgary.

"Hon. Mr. Veniot, Postmaster-General, is particularly anxious to make the service an outstanding success and is co-operating with the national Minister of Defence to obtain rapid installation of lighting facilities and landing fields," Mr. Herring said.

Establishing the air mail route will mean a tremendous amount of work. Some 1,500 miles of territory have to be covered. Considering the fact that the main channel for the service will be through Winnipeg and Calgary, it has been thought desirable that the first steps should be taken toward lighting that particular part of the link. This task may not be accomplished for some weeks.

On completion of the work on the main link it is understood that provision will be made for night flying and intermediate flying fields between Regina, Saskatoon and Edmonton.

### Canadians

Rising Generation Should Foster A Belief In Themselves As Canadians

Ancestry is something of which every man has a right to be proud, but, whether native-born or not, it should not transcend a man's belief in himself as a Canadian. At our banquets and public gatherings, men of Canadian birth are prone to brag of their Scotch, English or Irish descent. If they placed more stress on the fact that they are Canadians it would at least serve as an example to newcomers to foster a belief in themselves as Canadians and not Scandinavians, Russians or Hollanders, as the case may be.—Chatham News.

### To Study Empire Timber

With a view to finding new uses and new markets for the timber resources of the Empire, the Empire Marketing Board has approved a capital grant, not to exceed \$150,000, to be devoted to research on Empire timber at the Princess Richardson Forest Products Research Laboratory, London, under the direction of the Department of Scientific and Industrial Research.

### Fruit Production Problems

W. Sandford Evans, member of the Manitoba Legislature for Winnipeg, has been appointed a commissioner to investigate problems connected with the production and distribution of British Columbia fruits, particularly in the Okanagan Valley. The appointment is announced by the British Columbia Government.

Germany, the United States, the United Kingdom and France together, exported \$800,000,000 worth of chemicals and allied products in 1928.

## Keep Your Farm Up-to-Date This Inexpensive Way

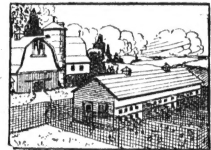

### For Farm Homes

Faded or cracked walls and ceilings detract from the pleasure of farm life. Hundreds of farm owners, realizing this, have transformed their rooms into bright, colorful interiors by applying Gyproc over all the old, ugly surfaces—then decorating. Remarkably attractive results are thus achieved at small cost. Every room becomes much more beautiful, livable and up-to-date.

### Barns and Poultry Houses

Gyproc lined barns and poultry houses provide the best protection against fire, cold, heat and vermin that your stock can have. You can erect strong, rigid Gyproc sheets yourself in short time and at little expense. After a few months you will be delighted with the improved health of your cattle and the increased laying capacity of your flock.

### Utilizing Waste Space

Those musty, inaccessible waste spaces in your attic and basement! Why not convert them into extra rooms by erecting Gyproc walls and ceilings? You can have a playroom, a laundry room, a workshop, a special preserving closet or any other kind of room you wish.

For fast, economical, fire-proof construction on the farm there is nothing to equal Gyproc. Write us for information or see your nearest Gyproc dealer.

### Recipes For This Week

(By Betty Barclay)

#### PATTY CAKE PIE

- 3 eggs.
- 3 tablespoons lemon juice.
- 1 teaspoon grated lemon rind.
- 1 cup sugar.
- 3 tablespoons flour.
- 1/2 teaspoon salt.
- 1 tablespoon melted butter.
- 1 1/2 cups milk.

Beat egg yolks until thick and lemon-colored. Add lemon juice and rind. Mix sugar, flour and salt, and add to lemon mixture. Stir in melted butter and milk and fold in stiffly-beaten egg whites. Turn into pie tin lined with crust and put into hot oven (450 degrees). After 10 minutes reduce heat to moderate (250 degrees) and continue baking 20 minutes longer, or until filling is firm.

#### GRAPE PRESERVES

For each pound of Concord grapes, use one-half cup of water. Wash and skin the grapes—seedling also if you can spare the time. Use sugar equal to one-half the weight of prepared fruit. Boil sugar and water ten minutes. Add the fruit, and cook until grapes are clear and the syrup thick. Then pour into hot, clean jars and seal.

More things come to those who don't wait for them than to those who do.

Oil of roses is distilled from buds gathered in the morning while the dew is still on them.

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain de-

### Investigating New Marketing System

May Market Wheat In Europe On Basis Of Protein Content

Dr. Robert Newton, professor of field crops at the University of Alberta, has been asked by the National Research Council of Canada to make an investigation of the possible reception which would be given in Europe to a system of marketing wheat on a basis of protein content. The report will be prepared for the next session of parliament.

Suggestion that such an investigation be undertaken was made by the agricultural committee of the House of Commons last session. The announcement that the work would be done by Dr. H. M. Tory, at a session of a committee of the research council here.

The report of grading of wheat by protein content, published by the research council for the committee, was approved.

### To Use Rocket Car

An attempt will be made to lower world automobile speed record at Ormond Beach, Fla., next spring, with a German Rocket car. The builder of the Rocket cars, Sander and Volkart, plan to use a car supplied with 64 Rockets instead of the 26 on the present car.

Martha—I thought you told me that you wouldn't give away that secret I told you last night.

Madge—I didn't give it away. I exchanged it for another one and an ice cream soda.

## Sour Stomach

parts. You are happy again in five minutes.  
Don't depend on crude methods employed the way you just evolved it all the years of searching. That is Phillips' Milk of Magnesia.  
Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

More cups to the pound, more flavor in the cup, more tang to the taste. That's what makes Red Rose Tea so popular. Every package guaranteed.

## The Singing Fool

By HUBERT DAIL  
Copyright, 1928, Warner Bros. Pictures, Inc.

### SYNOPSIS

Al Stone, the singing waiter and song writer at Blackie Joe's New York night club, is discovered by Mark, the famous Broadway revue producer. Al insists on helping Molly, the beautiful singer, because he loves her. Molly marries him, not loving him, and he pulls her up the ladder of fame. Meanwhile, Grace, the cigarette girl at Blackie's, who loved Al without his knowing it, is left behind. Molly discovers she is to have a baby. She resents this at first, but is reconciled after Little Junior arrives. But when she returns to the stage she loses interest in the child. Her romantic friend, John Perry, Al's best friend, is revived and one day Grace sees them riding in Molly's limousine. She also sees the man put his arm possessively about Molly.

### CHAPTER XII.

Night on Broadway. The richly dressed limousine crowds had left the theatres and were pouring into the fashionable night clubs. The electric signs on the "night clubs" blinked, beamed, and beckoned. "Here," they seemed to say, "you may find success from care, here you may eat, drink and be merry until dawn—if you have the price."

Brightest among those insidiously beckoning lights was the brilliant sign of the CLUB BOMBO. Al Stone was part owner and master of ceremonies. What a contrast to the shabby old place where he had once worked—Blackie Joe's. Al often thought of it. And what a contrast between the job he now held and his old one. Once he had been a mere singing waiter, eager for the tips that the none too affluent patrons of Blackie's place threw him when they happened to like his comic songs and his ad lib wise-cracking. Now he was using his fame as Broadway's foremost song writer to pull the shekels into his pocket at the Club Bombo. He was the magnet, the favorite of the big-time crowds. They called him the "Singing Fool" because he could put his songs over with such emotional intensity.

The ballroom of Al's club was expensive and expansive, designed to hold the huge crowds that flocked there. The tables spread across the room an army of round white tops with a small cleared space in the middle for the colored performers and for dancing. One of the best jazz orchestras in the land furnished music from a raised platform at one side.

IT'S folly to suffer long from neuritis, neuralgia, or headaches when relief is swift and sure, thanks to Aspirin. For 28 years the medical profession has recommended it. It does not affect the heart. Take it for colds, rheumatism, sciatica, lumbago, Gargle it for a sore throat or tonsillitis. Proven directions for its many uses, in every package. Every drug store today has genuine Aspirin which is readily identified by the name on the box and the Bayer cross on every tablet.

**ASPIRIN**  
Aspirin is a Trade-mark Registered in Canada

Now as Al walked slowly up and down near the doorway, greeting new arrivals, the jazz boys were sending out their plaintive, seductive strains and the floor was crowded with dancers.

"The music died away, like a haunting cry echoing down a ravine, the lights went out and the couples left the floor. Then the spotlight picked up Al alone on the dance floor, and a roar of applause greeted him. He smiled happily and shook hands with himself—a symbolic gesture indicating that he was shaking hands with everyone.

"Ladies and gentlemen"—his voice came clear and resonant—"we're all here and I want you to have a good time. Forget the concert stage and be happy. But before the show starts I want you to know a few of the celebrities we have present. Here's Dolores Costello, the famous motion picture star; there's Jack Barrymore, who needs no bush. At the right you see Mayor Walker of our great city."

Finally Al's glance rested on a vacant table that was rather conspicuously placed. This was the special table that he always kept reserved for Molly and himself. Now he saw a couple stop before it and plead with the head-waiter to let them have it. He moved across the room quickly.

"Sorry, folks," he said, with polite regret, "but this table is always reserved. We'll find you one just as good" don't worry, Herman, see that the lady and gentleman are well seated."

Al gave the waiter a friendly clap on the shoulder and turned away. But when the couple had gone he glanced back toward the table, gazing at it with tender speculation. This was Molly's table and in a moment, she would be here to occupy it. It must be held inviolate.

This table was somewhat different from the others; it was more tastefully arranged and the flowers on it had been specially selected and placed by Al himself. He was not quite satisfied with them, so he began to rearrange them, forgetting the crowd entirely. Then he produced a jeweler's box from his inside coat pocket and slipped it under Molly's napkin. Attached to it was a card which read "To my darling wife on her anniversary and mine."

This done, Al looked up, smiling happily, and glanced at his watch. She should be here by now.

At that moment Molly and John Perry were comfortably ensconced in her blue limousine, proceeding with purposeful slowness toward the Club Bombo. Molly had told the chauffeur not to hurry.

She sat leaning against Perry's strong shoulder, while they conversed intimately in whispers. Perry was pleading, but Molly shook her head, although undecidedly.

"John, it's too complicated for me to solve. I love you, but—"

"But what?"

"Well, think of my position. Here I am, with all the money I can spend and all the public applause my nature craves. I'm sitting pretty, you can't deny that."

"I know all that. I've heard it a thousand times. But there's one thing you haven't got and that's important. You have no husband to love you whom you happen to love. Think it over."

Molly stared soberly straight before her, twining and untwining her small, white-gloved fingers.

"Are you falling in love with Al?" whispered the racketeer, bantering and sarcastically. "Do you like him more than me?"

Molly shrugged her shoulders impatiently. "We won't go into that—you know the truth. The point is, Al has put me over. I wouldn't be famous if it wasn't for him. I'm no sap—I know that. That's why I've stuck to him so long. If I quit him he'll turn on me and where will I be? Just a girl who will drift back into the unknown."

"Nonsense, Molly!" exclaimed Perry. "You're a star in your own right. Besides, is fame everything? Doesn't love count for something?"

"You bet it does!" cried Molly vehemently, and almost bitterly. "If I didn't think so I would never have let you come near me."

John Perry smiled. He knew the cool, calculating, ambitious Molly was mad about him. But he was mad about her, too. At first his interest had been the lightest of heart affairs, for he was a born philanthropist, but gradually the situation had changed. To his own amazement a longing for Molly possessed him; now he found himself willing to dare anything to get her.

Suddenly she turned to him and said gravely, "What about my baby—what about Junior?"

But Perry had no answer to that; he merely shrugged his shoulders. He wanted Molly to himself, without any entanglements. Molly gave a tired smile and fixed her gaze on the broad back of the chauffeur, just ahead.

How much did that man know of her interest in John?

Her unspoken words came out short as Perry's arm went around her, and she felt herself drawn reluctantly toward him. In the dark compartment of the limousine her lips were pressed hard against his mouth; his arms were around her like a vise.

She forgot Al and Junior, forgot her ambitions, forgot everything but the passionate embrace of the man who held her. She relaxed for a thrilling moment and smiled into the eyes only a few inches from her own. Then she pulled herself abruptly away, for the car was approaching the Club Bombo.

She quickly snatched a jeweled compact from her tiny bag, gazed at herself in the mirror, patted her disarranged hair back into shape. Her rouged lips had been smudged, so she wiped Perry's handkerchief, gently wiping off the excess rouge. Meanwhile, the racketeer gazed at her in admiration and brushed her face powder from his top-coat lapel.

"You've missed me terribly."

"Sorry," whispered the imperturbable Perry.

The chauffeur, facing upon the limousine door and Molly stepped out. Straight ahead she saw Al in the night club doorway, smiling at her expectantly.

"To Be Continued."

### Farm Incomes Higher

Average Increased By Seventy-Five Dollars In Year

The average cash income per farm home in the Provinces of Manitoba, Saskatchewan and Alberta last year was \$2,544, exclusive of the value of seed, feed, meat vegetables and other commodities produced and retained by the farmer for his own requirements. This is an increase of \$75 per home over the previous year.

"The Oil of the People." Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its degree of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

### Frequent Test Essential

That a man has passed a driving test with flying colours does not mean that he could pass the same test as successfully ten years thereafter. In the interval he might have suffered all sorts of illnesses and have acquired more defects which gravely affected his qualifications as a motor vehicle operator.

Ex-Kaiser Wilhelm is still the wealthiest German. His estate being estimated at 500,000,000 gold marks, approximately \$119,000,000.

People like to trade with a going concern provided it isn't going backwards.

### Misrepresenting Canada

Canadian Text Books Need Revising In Some Particulars

School history textbooks written, edited and printed in the United States for use in Canadian schools have of late stirred some impetuous in Canadian educational circles and beyond, the argument being, quite properly, that Canadian children should not be raised on foreign-made literature which is largely propaganda. Now comes a complaint by no less an authority on the subject he deals with than Vilhjalmur Stefansson, the Arctic explorer, that books written in Canada, presumably by Canadian authors, margin Northern Canada. Mr. Stefansson should know where he speaks, and attention may be given by the authorities to his observations. One instance of the misrepresentation the explorer complains of is that the Canadian textbooks say that the temperature in the northern districts rarely rises above the zero point, and in such districts he points out the mercury rises as high as it does in Winnipeg. Places where trees grow one hundred feet high are described to Canadian school children as being "barren," while areas where the verdure is on level with that in Southern Alberta are referred to as "places where moss and lichens are found." Mr. Stefansson looks forward to the production of primary textbooks in the north as the next development.

It becomes evident that much of the matter contained in school textbooks was compiled many years ago, or, if recently written, was taken from the earlier books, and that the writers have had no opportunity of ascertaining the actual facts. Education ought to do well to get their heads together, to consider the state of affairs mentioned by the explorer, apply the remedy where it may be needed and also cure the evils complained of as to historic facts in the textbooks. Montreal Gazette.

### Little Helps For This Week

"Surely the Lord is in this place, and I knew it not."—Genesis xxviii, 16.

Since God doth will that some shall dwell at ease.

And others shall know hardness: This is sure.

The lot that fits each nature He foresees; And wherefore murmur when we must endure?

Some day life-loving wisdom will be plain As the sweet sunshine following after rain.

Do not despise your situation; in it you must act, suffer and conquer. From every point on earth we are equally near to heaven and to the Infinite.—Henri Frederic Amiel.

Accept your lot as a man does a piece of rugged ground, and begin to get out the rocks and roots. To deepen and mellow the soil, to enrich and plant it.—Henry Ward Beecher.

Corns are painful growths. Hollo-way's Corn Remover will remove them.

### Where Germany Leads

Has Greatest Number Of Miles Of Airways In Operation

The United States leads in civil air transportation so far as mail carried and the number of miles flown are concerned, but Germany is ahead of the rest of the world in miles of airways in operation, number of passengers carried, in commercial mileage per aeroplane, and also in pounds of express and freight carried. Canada comes second in number of passengers carried with 74,689, and is third in express and freight. The figures are for 1928.

"Land sakes there, Mary! What's all that noise in the kitchen?"

"You don't expect me to break three platters and two cups without makin' a noise, do yuh?"

Slabs of copper in Sweden, tea compressed into bricks in China, tobacco, milk, cattle and salt, were at one time used as coins.

Minard's Liniment—The King of Pains.

### Requires Aid Of People

If Timber Resources Of Empire Are To Be Preserved

The London Times has issued a warning which should be noticed throughout the British Empire. It declares that the enormous timber resources of the Empire are a rapidly vanishing asset. Further than that, it says that unless an end is put to extravagant waste, and new timber reserves created in suitable areas, the day must inevitably come when the world's supplies will prove unequal to the demand. Indeed, the opinion has been expressed by competent authorities that this day is not very far off. The aid of the people is required in this matter; for if the farmers would take advantage in Canada of the free offers of young trees for plantations, it would help enormously, and why should not municipalities do so too, and earn revenues? One wonders, too, why thousands of acres of waste land in Great Britain are not used for reforestation purposes. This would provide employment for the unemployed and wealth for posterity.

Like a Grip At The Throat. For a disease that is not classed as fatal there is probably none which causes more terrible suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and finally, though the attack passes, is left in unceasing dread of its return. Dr. J. D. Kellogg's Asthma Remedy is a wonderful remedial agent. It immediately relieves the restricted air passages as thousands can testify. It is sold by dealers everywhere.

### France Sending

Immigrants To Canada

Arrival Of First Actual Settlers From France In Many Years

Heralding the arrival later, of more than twenty families who are to come direct from France to settle on farm land in Canada, two families comprising some dozen souls reached Montreal, by the Canadian "Ascania," to settle under the auspices of the Colonization Department of the Canadian National Railways.

The first actual settlers to come from France to Canada in many years, and they are merely the forerunners of other families who will come out next spring.

### The First Alarm Clock

It comes as a surprise to find that the alarm clock appeared more than three centuries ago. A beautiful timepiece made in Germany about 1000, indicated the time on a great horizontal face, while the movement of the hand served to strike an alarm. The owners of this remarkable clock must have overslept frequently for the mechanism was far from reliable.

### An Amazing Project

Plan To Make Inland Sea In Sahara Is Feasible

Ancient prophecies may be fulfilled if a project declared feasible by engineers is carried out. It involves making a vast inland sea in the Sahara, and that would be accomplished by digging a canal which would begin about twenty-five miles from Biskra and run out to the Gulf of Gabes, in Algeria. It would be 210 yards wide, thirty-nine yards deep 170 miles long. It would connect the eight shots (shallow saline lakes), that exist in that region, and would transform it into a vast interior sea having a surface of 14,600 square miles.

### IS THERE A BABY

IN YOUR HOME

Is there a baby or young children in your home? If there is you should not be without a box of Baby's Own Tablets. Childhood ailments come quickly and means should always be at hand to promptly fight them. Baby's Own Tablets are the ideal home remedy. They regulate the bowels, soothe the stomach, banish constipation and indigestion; break up colds and simple fevers—in fact, they relieve all the minor ills of little ones. Concerning them Mrs. Mavis Cabotte, Makamiki, Que., writes: "Baby's Own Tablets are the best remedy in the world for little ones. My baby suffered terribly from indigestion and vomiting, but the Tablets soon set her right and now she is in perfect health." The Tablets are sold by medicine dealers or by mail at 25 cents a box from Dr. M. Williams' Medicine Co., Brockville, Ont.

### A Fruitful Cherry Tree

A cherry tree at Salem, Oregon, known to be over 70 years old, has produced 1,137 pounds of cherries this year, bringing a total of \$113.70. The tree is ten feet around the base and the body sound, according to R. E. Shinn, who has been caring for it.

## EVEREADY LAYERBILT

Gives MORE Service

Proven for two years to be the most economical, long-lasting and satisfactory of all "B" batteries. Built of flat cells packed tightly together. Entire battery filled with current-making material, giving more service for all other money. No waste space between round cells as in other "B" batteries. No fine soldered wires to make trouble. Small wonder most battery-powered sets are going Layerbilt. "B" batteries will return you weeks or months more service.

## Main Street

Mr. E. L. Elford was in Edmonton Wednesday.

If you want Service keep your telephone line up.

Mr. E. Johnson made a business trip to the City the first of the week. The Village fathers have had the town eleven cleaned out this week.

Have you tested your batteries lately? You may need new ones.

The meeting of the Irma-W. L. was held at the home of Mrs. Thurston on September 5th.

A son arrived at the home of Mr. and Mrs. N. Figneshau, Wednesday, both are doing nicely.

Mrs. E. Simmons and Mrs. J. Jack returned the first of the week after motoring to Chipman, Alta., where their husbands have a contract for graveling the streets.

Mr. and Mrs. F. J. A'an left for Winnipeg Wednesday evening after spending a week with their daughter Mrs. F. J. A'an and Mr. and Mrs. Allan on their way home after a pleasant trip to the coast.

Owing to the special show in Irma Monday night there will be no picture show Wednesday, September 18, but a good show will be here the following Wednesday.

W. E. MacRae left today to attend the Rawleigh convention which will be held in Edmonton September 18th to 20th when Rawleigh Dealers from all northern Alberta and Saskatchewan will be in attendance. Mrs. MacRae accompanied him.

Miss Margaret Adams of Los Angeles, California, is visiting with Mr. and Mrs. F. Peterson of Irma and with her brother Mr. Hugh Adams of Fabyan. Miss Adams is a sister of Mrs. George Graham who formerly lived N. E. of Irma before moving to California.

Rain has delayed threshing operations the first of the week. What grain has been threshed has been rather disappointing in regards to yield but it has been of a very high grade mostly grading No. one and two.

Wednesday the Irma district was again visited with a bad storm which blew some of the lighter soil into drifts, especially on Strawberry Plains. In this district some of the roads are almost impassable on account of the sand being piled like snow drifts along the road.

## AGE INCIDENCE

### OF TUBERCULOSIS

The importance of protecting young children against tuberculosis has been frequently pointed out. Perhaps because of this, if we may judge from the opinion expressed by various people, quite a number of adults are under the impression that they need not take any particular care, and that when they pass the fortieth year they run no further danger of incurring tuberculosis. In order to correct this false idea, we are giving the age of death for this disease in Canada, in the year 1926—

Under 1 year .....	233
1 to 4 years .....	443
5 to 9 years .....	236

10 to 14 years .....	386
15 to 19 years .....	859
20 to 29 years .....	1,970
30 to 39 years .....	1,428
40 to 49 years .....	1,011
50 to 59 years .....	530
60 to 69 years .....	450
70 years and over .....	273

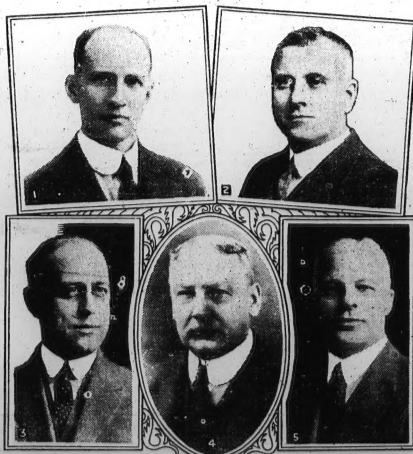

From these figures it will be evident that, while tuberculosis takes its chief toll during early adult life, causing a high percentage of all deaths from 20 to 40 years of age, it is not, by any means, confined to any period of life.

A large percentage of all people take into their bodies, some time during their lives, the germs of tuberculosis. In most cases, these germs are held at bay and the disease never actually develops. The germs are there, however, and are a constant threat. They are most apt to get their chance to cause disease if the body is weakened through the attack of some disease, such as influenza, or even a common cold or diseased teeth. Over-fatigue, worry and exposure also lower the resistance of the body. If additional heavy doses of the germs of tuberculosis are taken in, they may cause actual disease at any age.

For all these reasons, it is evident that, throughout life, care should be taken to keep the body fit and to avoid infection.

Questions, concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto will be answered personally by letter.

## C.N.R. OFFICERS PROMOTED

Officers of the freight traffic department of the Canadian National Railway's prominently concerned in the recent retirements and promotions are shown above. They are: (1) J. M. Hoen who has been promoted Assistant Freight Traffic Manager, Winnipeg; (2) J. M. Macrae, who has been appointed General Freight Agent, Vancouver; (3) W. Hately, who becomes General Freight Agent, Winnipeg; (4) A. E. Rosevear, General Freight Agent, Winnipeg, who, on Dec. 15th, retires after 52 years of service; and (5) F. G. Adams, Assistant General Freight Agent, Winnipeg, whose duties are enlarged to give him supervision over rates and divisions.
